Cancer Care @ Home

Programme Overview

Zydus Cancer Centre delivers global standard cancer care with human touch and compassion. We now bring the same level of care into our patients' homes and aim to make primary / palliative cancer care not just more accessible, but also more affordable; offered with complete accountability to our patients' needs.

With Zydus Cancer Centre Home Care Services, you can be sure that you will receive hospital-quality healthcare in the comfort of your home. We extend specific care services for patients enrolling in our home health care services. Our sole objective is to ensure utmost care to the patients without a need for them to leave their home. The services are designed keeping in mind the needs of the patient and their families. Taking a step ahead, our staff are happy to train patient's relatives in essential management of the patients based on the requirements of their patient. The service offering is combined with on-demand e-consultation to the patients allowing them to get connected with their treating consultants.

Follow our programme highlights and if you have any questions we will be happy to assist.

Cancer Care @ Home: Who can enroll?

- Patient who has had or who is receiving treatment at Zydus Cancer Centre
- Located within 5 km radius from Zydus Cancer Centre
- Patient whose treating consultants approve that specific services can be taken at home
